I have been coding for around a year now, building up my groundwork and knowledge of technology. I have the groundwork to build new skills and I would like to contribute to a great cause.

Professional Skills

Language Acquisition

Able to maneuver around different coding languages

- Able to move around different languages and mediums to ensure a good outcome for any format.
- Able to learn and experience myself with different coding languages through research and self reliance.

Teacher

Able to convey ideas and theories verbally and in written format.

- Taught a variety of people on technology topics involved in coding through fun and interactive activities.
- Able to conceptualize ideas into words and in a thorough manner.

Abstract Thinking

Able to produce solutions without physical groundwork like existing code.

- Developed abstract thinking skills through a variety of projects. (In Web Portfolio).

Professional Experience And Projects

Web Developer For AJBeats

Designed website for a music course webinar.

Software Developer

Designed and built an electron-js desktop application used to encrypt and store passwords like a password keeper.

Tech Stack

Frontend web development

Backend development

Product Design

Database programming
